Area: "promotion of the benefits of good testing."

Information Items

Following a review of the current status of the OCR guidelines on testing, the Board requested Dr. Kolen to provide a letter of appreciation to Patricia McAllister for her work in generating an effective NCME letter.

Dr. Fremer reported that he was in the process of launching a survey of parent attitudes toward standardized testing with support of the ATP. The survey will also seek information about what knowledge parents are interested in having about student education achievement.
